

NEW Student Powered Air Program

Get the PAPER Welding Helmet you
REALLY Want!

About the Student Powered Air Program

The Student Powered Air Program represents a national safety initiative, launched by AWS, to educate and encourage the next generation of welders to use Welding Helmets with integrated Powered Air Purifying Respirators (PAPR).

By signing up to the new AWS Student Powered Air Program, students who are currently studying in a welding-related field can access the exclusive **3M™ Speedglas™ G5-01 NC Welding Helmet with Adflo™ PAPR**.

This helmet gives apprentices and students alike the opportunity to step up to the market-leading Speedglas G5-01 flip-up welding helmet, at a budget-friendly price point!

Getting your new helmet is as easy as 1, 2, 3!

1

Sign up to the new Student Powered Air Program

Simply fill in the sign up form with your details and valid student card or documentation confirming you're a current student.

2

Receive your access code

Once approved, AWS will send you an email with your exclusive access code for this offer.

3

Visit Bianco Construction & Industrial Supplies Kilburn

Present your access code email and place your order!
42-56 Grand Junction Rd, Kilburn SA 5084

Sign up for the Student Powered Air Program today!

www.apexweldingsafety.com.au/student-powered-air-program

To be eligible for the Student Powered Air Program, you must be currently studying a welding related field at TAFE or a TAFE equivalent institute, with a valid student card or alternate form of documentation that can verify your status as a current student.

3M Speedglas G5-01 NC Welding Helmet

The **Speedglas™ G5-01 NC with Adflo PAPR** (part no. 617710) gives you all the premium G5-01 features including a huge 170x104mm clear grinding visor, airflow climate control, removable welding visor and powerful Adflo powered air respirator - **at a 30% lower price point than Speedglas G5-01VC.**

- Smooth flip-up function reveals largest ever Speedglas clear grinding visor (170 x 104 mm)
- Large 55 x 107mm viewing area with Speedglas™ True-View optics
- Shades 3/5, 8-12
- Adjust the amount and direction of the airflow inside your helmet with Climate Control
- Removable flip-up component reduces helmet weight by 35% for extended non-welding work
- Adflo PAPR offers market-leading respiratory protection specifically designed for welding
- Meets Australian & New Zealand standards for high-impact face protection (AS/NZS1337.1), eye protection (AS/NZS1338.1), and respiratory protection (AS/NZS1716).

Includes a **FREE** Speedglas Carry Bag!

Why Powered Air Respiratory Protection?

Welding fume is a known carcinogen and while the dangers of welding fume are very real, once qualified, and quantified, protecting your health can be straightforward.

Powered Air Purifying Respirators (PAPR) can provide air over 50 times cleaner than the air inhaled by an unprotected welder.

When compared to disposable and reusable half mask respiratory protection, PAPRs provide superior respiratory protection and do not require fit-testing.

Protecting welders' eyes, faces and lungs, 3M™ Speedglas™ Powered Air Respiratory Welding Helmets are the benchmark in the welding industry: proudly worn by over one million active welders around the world.
